

## Networking Resources

Information on networking can be found in a variety of resources. This guide is designed to help point you in the right direction by providing a starting point for your research. Remember to always ask a librarian when you need assistance.

### Reference Sources

The TK section of the Reference collection contains sources relating to networking.

Dictionary of the Internet	REF TK 5105.875.I57148
Dictionary of Networking	REF TK 5105.5 D948 1999
Encyclopedia of Networking	REF TK 5102 T85 2002

### Databases

You can always access one of the databases available to you via the library's homepage at <http://library.cw.edu> or by clicking on the library icon on any on-campus computer desktop. The databases can also be accessed from the CW Portal at <http://portal.cw.edu> and then clicking on the CW Library link.

Try the following databases to find articles relating to networking:

#### **EBSCO Academic Search Elite**

This database offers information in nearly every area of academic study including: computer sciences, engineering, physics, chemistry, language and linguistics, arts & literature, medical sciences, ethnic studies and more.

#### **Proquest (ABI/INFORM Trade & Industry)**

Search more than 750 business periodicals and newsletters with a trade or industry focus. Provides users with the latest industry news, product and competitive information, marketing trends, and a wide variety of other topics.

#### **Proquest (Research Library )**

Search for coverage of a broad range of subjects including arts, business, children, education, general interest, health, humanities, international, law, military, multicultural, psychology, sciences, social sciences, and women's interests.

### Internet Resources

There are numerous networking related websites on the Internet. You should always check the source that is providing the information to ensure that it is valid and reliable. Here is a section of reputable sources that can start you on your way.

#### **Light Reading**

<http://www.lightreading.com/>

News, event listings, job listings, opinion, product test results and financial and technical information regarding optical networking. Free tutorials on optical networking.

## **Server Files**

<http://www.serverfiles.com>

A Server software directory for Network administrators & IT professionals with lists of networking & server software for Windows 2000 & NT. The site does not focus on single user software.

## **TechWeb**

[www.techweb.com](http://www.techweb.com)

News, opinions, reviews, discussions, downloads and polls all related to information technology.

You can always use a search engine to find professional organizations or additional information that relate to networking. Try Google (<http://www.google.com>) or the Librarian's Index to the Internet (<http://lii.org>).

## **Additional Resources**

### **Books**

Active Defense	TK 5105.59 B75 2001
The Book of Wi-Fi	TK 5105.78 R67 2003
Cisco ASA and PIX Firewall Handbook	
Hardening Network Infrastructure	QA76.9.A25 N64 2004
Home Networking	TK 5105.75 S533 2000
Microsoft Exchange Server 2003	QA76.9 C55M264 2004
Securing the Network from Malicious Code	TK 5105.59 S373 2002

### **Periodicals**

E-Server Magazine  
InfoWorld  
Information Week  
Mobile Business  
Network Computing  
Networking World  
SQL Server  
Sys Admin  
Windows and Net Magazine

**Always remember to ask a librarian for assistance. We are here to help.**
